Nguyễn Cao Vạn Hưng

Intern-Software Engineering

0799837864 ncvhung2626@gmail.com https://github.com/ncvhung2626 Ho Chi Minh city

SUMMARY

final-year Software Engineering student at VietNam Aviation Academy (VAA) with a strong academic record and a solid foundation in **Node.js**. Capable of building **full-stack web applications**, especially **backend development** with foundational skills in Feature Planning, System Architecture Design, and Problem Solving.

PROJECTS

Haihand - E-commerce Platform (academic project) - teamsize (5 people) 1/2026 - now

Backend/frontend - developer

https://github.com/leminhtriet3105206-dev/HaiHand-Marketplace

- Built a robust backend REST API with **Node.js/Express**, integrating **JWT** for secure authentication and **Cloudinary** middleware (Multer) for efficient image upload, storage, and optimization.
- Implemented **Real-Time Communication** using **Socket.io** to enable instant peer-to-peer messaging (live chat) between buyers and sellers, alongside live system notifications.
- Created a dynamic, responsive client interface using **React** and **Tailwind CSS/Bootstrap** for product discovery, and a separate server-side rendered **Admin Portal** using **EJS** for content moderation.

University Student Management 1/2026 - 4/2026

https://github.com/ncvhung2626/WebSinhVien

- Designed and developed a comprehensive **Student Management System** handling core university operations including course registration, attendance tracking, grading, and fee payments.
- Engineered a scalable, modular backend API using **NestJS** and **TypeScript**, leveraging **TypeORM** with **PostgreSQL** for robust relational data modeling and complex query optimization.
- Implemented secure, **Role-Based Access Control** (Admin, Lecturer, Student) utilizing **Passport.js** and **JWT** to ensure robust authentication and authorization across all endpoints.
- Developed responsive, role-specific client interfaces (dashboards) using HTML5, **Vanilla JavaScript**, and **Bootstrap 5**, seamlessly integrating with the backend REST APIs.
- Integrated advanced system features including batch data processing via **Excel import/export**, automated email notifications (**Nodemailer**)

SKILL

Backend Development: Node.js, Express.js, NestJS, TypeScript, RESTful APIs, JWT,emailjs, Socket.io (WebSocket)
Frontend Development: HTML, CSS, JavaScript, TypeScript, ReactJS, Tailwind CSS, Bootstrap, EJS
Database: PostgreSQL, MongoDB
Tools & Services: Git/GitHub, VS Code, Postman, Vercel, Railway

EDUCATION

VietNam Aviation Academy 2024 - now

language:
+English: Conversational level — comfortable with everyday and basic work communication.
+Japan: Basic level — familiar with elementary vocabulary and simple conversation.
